No question, as a player and as a coach, this is the best mouth guard I have known. It fits very well because of the way it is molded to your teeth. The mouth guard does not come out during the game, it is comfortable and extremely easy speak with therefore, the players can communicate with each other. When they can easily communicate, they play better as a team. I have even had some of my players leave the mouth guards in well after the game.

As a mother, I find the mouth guard is safer than any other mouth guard out there, because my kids wear them from the time they step on the field to the end of the game. They don't have to continuously take them out because they are uncomfortable or to talk so the mouth guards stay put! I strongly encourage all my players to get these mouth guards and after a few years I do not need to say a word as the older players tell the younger players how great they are and I do not even need to stress it!

Lyn Reitenback
Ithaca High School Lacrosse Coach

First, I just want to thank you again for the Mouth guard. I have worn it every game since I got it, and love it. I admit, I have even forgotten to take it out after a game. From the time I started playing contact sports, I have always hated wearing a mouth guard. I have worn several different types and even had a dentist make me one. Every mouth guard I wore was uncomfortable, bulky, and made me gag because it would constantly move around and needed to be taken out to drink. So when Katie recommended I get another mouth guard, I was hesitant. However, from the first fitting I knew this one would be different. I have worn the mouth guard every game since I got it, and am amazed at the difference. The way it is formed to both my teeth and gums, creates a suction that stops it from moving around, doesn't impact my breathing, and allows me to communicate with teammates, without gagging on it. Even though the mouth guard is half the size of ones I've worn in the past, I feel it has more protection, and fits much better.

Thanks again,
Scott Prasek
Applecore 1999-2000

I just wanted to thank you for the terrific mouth guard you supplied me. I have used other mouth guards in the past and none have fitted, felt, and performed as good as yours. Being an NHL referee not only do I need the proper guard for protection, but I also need to be able to assess penalties without taking the guard out of my mouth. Your guard does everything that I need and I recommend your mouth guard to any person playing any sport.

Regards,
Kevin Pollock
NHL referee

The NHL officials who have been fitted with your developed mouth guard have had only positive results while wearing them. They have praised how they can talk or communicate with players or coaches without removing their guards while doing so during games. They also like that the guard is not noticed facially while wearing it.

Thank you for your professional courtesy helping our officials with the prevention of dental injuries and with their success on the ice. We definitely will have as many officials as possible wear your excellent custom mouth guard.

Dave T. Smith
Director of Fitness and Medical (NHL)
